

Audit Workpaper - Flagged Journal Entries

2025-01-04 | AP | 5000.00

The entry was flagged because it contains a round-dollar amount, was posted on a weekend, and repeats the same account/amount combination, all of which are common indicators of potential errors or fraud. Next, verify the supporting documentation for the transaction, confirm the business purpose and authorization, and ensure that no duplicate posting exists in the ledger.

2025-04-26 | Cash | -4000.00

The entry was selected for testing because it contains a round-dollar amount, was posted on a weekend, and duplicates an existing cash posting with the same amount and account, all of which are red-flag indicators of potential errors or misstatements. The next step is to verify the supporting documentation (e.g., cash receipt or payment vouchers), confirm the transaction date and approval authority, and ensure that no duplicate posting has been made in the ledger.

2025-03-22 | AP | 1000.00

The entry was selected because it is a round-dollar amount, was posted on a weekend, and duplicates the same amount-account combination, all of which are common fraud and error indicators. Next, obtain and review the underlying invoice or receipt, verify proper authorization, and confirm that no other transaction already recorded the same \$1,000 AP posting for the same date.

2025-01-25 | AR | 4000.00

The entry was selected for testing because its round-dollar amount, posting on a weekend, and duplicate account/amount combination are red-flag indicators of potential posting errors or fraudulent activity. Next, we should obtain and review the original invoice or receipt, confirm the transaction's authorization, and verify that no duplicate posting exists in the ledger.

2025-04-26 | Expenses | 5000.00

The entry was selected for testing because it contains several classic red-flags: a round-dollar amount, posting on a weekend, and a duplicate amount-account combination that could indicate a duplicate or erroneous posting. Next, verify the underlying documentation, ensure proper authorization was obtained, and compare this entry to similar expense transactions to confirm its legitimacy and uniqueness.

2025-03-02 | AR | -1000.00

It was selected for testing because the entry involves a round-dollar amount, was posted on a weekend, and duplicates an existing account-amount combination—characteristics that often indicate potential posting errors or fraudulent activity. The next step is to verify the supporting documentation, confirm the transaction date and authorization, and ensure the duplicate entry is either a legitimate correction or an erroneous duplicate that needs reversal.

2025-06-07 | Expenses | -4000.00

The entry was selected for testing because it contains a round-dollar amount, was posted on a weekend, and duplicates an existing amount/account combination, all of which are red flags for potential errors or fraudulent activity. Next, verify the supporting documentation for the expense, confirm the transaction date and posting authorization, and ensure that no duplicate posting exists in the ledger.

2025-06-28 | Expenses | -1000.00

The entry was selected for testing because it features a round-dollar amount, was posted on a weekend, and duplicates an existing amount/account combination—characteristics that commonly signal errors or potential fraud. We will review the underlying documentation, confirm the date and authorization, and verify that the expense is legitimate and properly recorded.

2025-06-14 | AR | 1000.00

The entry was selected for testing because it involves a round-dollar amount, was posted on a weekend, and duplicates the same amount/account combination—each a common red flag for error or fraud. Next, we should obtain the supporting invoice or receipt, verify proper authorization, and confirm that no other posting exists for the same amount and account on that date.

2025-04-12 | Revenue | -4000.00

The entry was flagged because its round-dollar amount, weekend posting date, and duplicate amount/account combination are common indicators of potential posting errors or manipulation, so it was selected for detailed testing. Next, we should verify the supporting documentation, confirm the transaction date and approval, and ensure the revenue recognition criteria were properly applied for this \$4,000 posting.
